Projects

Insurance portal for well-known insurance company

This is an insurance portal which deals with claiming insurance, uploading details/bills and its sub process where user can track the claim application and take proper actions. My roles for the project have been:

- Developing and implementing various Web Forms and User Controls using ASP.NET, and C#. Using Grid View, to display data in a customized format in the ASP.NET web pages.
- Created Tables, Stored Procedures for data Access.
- Providing SQL and Manual data update support.

Pension Disbursement Management Portal

The aim of this project was to provide hassle free and smooth experience in pension disbursement process. It was a .Net MVC application with 2 micro-services for getting pension account details and bank account details respectively. Users can check their pension amount and have options to withdraw to their banks.

Surkshit Bharat

This project aims to eliminate the traditional way of crime reporting and connecting both victim and Police administration. The project consists of two portals for both victims and police providing basic functionality of reporting an incident and lost & found, registering FIRs and reverting the status of complaints for police.
